0001	Emergency or unscheduled radiological services: For emergency or unscheduled radiological services (Refer to rule B) the additional fee shall be 50% of the fee for the particular service (section 19.12: Portable unit examinations excluded). Emergency and unscheduled MR scans, a maximum levy of 100.00 Radiological units is applicable.	100	3 252.00					
MODIFIER GOVERNING A RADIOLOGIST REQUESTED TO PROVIDE A REPORT ON X-RAYS								
0002	Written report on X-rays: The lowest level item code for a new patient (consulting rooms) consultation is applicable only when a radiologist is requested to provide a written report on X-rays taken elsewhere and submitted to him. The above mentioned item code and the lowest level item code for an initial hospital consultation are not to be utilised for the routine reporting on X-rays taken elsewhere.							

<p>0005</p>	<p>Multiple therapeutic procedures/operations under the same anaesthetic: (a) Unless otherwise identified in the tariff structure , when multiple procedures/operations add significant time and/or complexity, and when each procedure/operation is clearly identifiable and defined, the following values shall prevail: 100% (full value) for the first or major procedure/operation, 75% for the second procedure/operation, 50% for the third procedure/operation , 25% for the fourth and subsequent procedures/operations. This modifier does not apply to purely diagnostic procedures . (b) In case of multiple fractures and/or dislocations the above values also prevail. (c) When purely diagnostic endoscopic procedures or diagnostic endoscopic procedures unrelated to any therapeutic procedure are performed under the same general anaesthetic, modifier 0005 is not applicable to the fees for such diagnostic endoscopic procedures as the fees for endoscopic procedures do not provide for after-care. Specify unrelated endoscopic procedures and provide a diagnosis to indicate diagnostic endoscopic procedure(s) unrelated to other therapeutic procedures performed under the same anaesthetic. (d) Please note: When more than one small procedure are performed and the tariff code provides for item codes for "subsequent" or "maximum for multiple additional procedures" (see Section 2. Integumentary System) modifier 0005 is not applicable as the fee is already a reduced fee. (e) Plus ("+") means that this item is used in addition to another definitive procedure and is therefore not subject to reduction according to modifier 0005 (see also modifier 0082) Application of modifier 0005 in cases where bonegraft procedures and instrumentaion are performed in combination with arthrodesis (fusion). (f) Modifier 0005 (multiple procedures/operations under the same anaesthetic) is not applicable if the following procedures are performed together 1 . Bone graft procedures and instrumentation are to be charged in addition to arthrodesis. 2. When vertebral procedures are performed by arthrodesis, bone grafts and instrumentation may be charged for additionally. (g) Modifier 0005 (Multiple procedures/operations under the same anaesthetic) would be applicable when an arthrodesis is performed in addition to another procedure, e.g. osteotomy or laminectomy.</p>

The referring practitioner will then be entitled to subsequent hospital visits for after-care. If the referring practitioner is not available, the specialist shall, on consultation with the patient, choose an appropriate locum tenens. Both the surgeon and the practitioner who handled the after-care, must in such instances quote Modifier 0006 with the particular items which they use. A 25% reduction in the fee for a subsequent operation for the same condition within one month shall be applicable if the operations are performed by the same surgeon (an operation subsequent to a diagnostic procedure is excluded). MODIFIERS GOVERNING THE ADMINISTRATION OF ANAESTHESIA FOR ALL THE PROCEDURES AND OPERATIONS INCLUDED IN THIS GUIDE TO TARIFF STRUCTURE	
0021	<p>IM: Determination of anaesthetic fees: Anaesthetic fees are determined by adding the basic anaesthetic units (allocated to each procedure that can be performed under anaesthesia indicated in the anaesthetic column[refer to modifier 0027 for more than one procedure under the same anaesthetic]) and the time units (calculated according to the formula in modifier 0023) and the appropriate modifiers (see modifiers 0037-0044). In case of operative procedures on the musculo-skeletal system, open fractures and open reduction of fractures or dislocations, add units as laid down by modifiers 5441 to 5448.</p>
0023	<p>AM: The basic anaesthetic units are laid down in the guide to tariffs and are reflected in the anaesthetic column. These basic anaesthetic units reflect the anaesthetic risk, the technical skill required of the anaesthesiologist/anaesthetist and the scope of the surgical procedure, but exclude the value of the actual time spent administering the anaesthetic. The time units (indicated by "T") will be added to the listed basic anaesthetic units in all cases on the following basis.</p>
	<p>Anaesthetic time: The remuneration for anaesthetic time shall be per 15 minute period or part thereof, calculated from the commencement of the anaesthesia, at 2.00 anaesthetic units is per 15 minute period or part thereof for the first hour. Should the duration of the anaesthesia be longer than one (1) hour the number of units shall be increased to 3.00 anaesthetic units per 15 minute period or part thereof after the first hour.</p>
0024	<p>IM: Pre-operative assessment not followed by a procedure: If a pre-operative assessment of a patient by the anaesthesiologist/anaesthetist is not followed by an operation, the assessment will be regarded as a consultation at a hospital or nursing home and the appropriate hospital consultation fee should be charged.</p>

0025	<p>IM: Calculation of anaesthesia time: Anaesthesia time is calculated from the time that the anaesthesiologist/ anaesthetist begins to prepare the patient for the induction of anaesthesia in the operating theatre or in a similar equivalent area and ends when the anaesthesiologist/anaesthetist is no longer required to give his/her personal professional attention to the patient, i.e. when the patient may, with reasonable safety, be placed under the customary post-operative nursing supervision. Where prolonged personal professional attention is necessary for the well-being and safety of a patient, the additional time spent can be charged for at the same rate as indicated above for anaesthesia time. The anaesthesiologist/anaesthetist must record the exact anaesthesia time and the additional time spent supervising the patient on the invoice submitted.</p>							
0027	<p>IM: More than one procedure under the same anaesthesia: Where more than one operation is performed under the same anaesthesia, the basic anaesthetic units will be that of the operation/procedure with the highest number of anaesthetic units.</p>							
0029	<p>CM: Assistant anaesthesiologists: When rendered necessary by the scope of the anaesthesia, an assistant anaesthesiologist/anaesthetist may be employed. The remuneration of the assistant anaesthesiologist/anaesthetist may be employed. No Additional fees may be charged for such services when rendered either prior to, or during actual theatre or operating time.</p>							
0032	<p>AM: Patients in the prone position: Anaesthesia administered to patients in the prone position shall carry a minimum of 5.00 basic anaesthetic units. When the basic anaesthetic units for the procedure are 3.00, two additional anaesthetic units should be added. If the basic anaesthetic units for the procedure are 5.00 or more, no additional units should be added.</p>			2	290.62	2	290.62	
0033	<p>IM: Participating in the general care of patients: When an anaesthesiologist/anaesthetist is required to participate in the general care of a patient during a surgical procedure, but does not administer the anaesthesia, such services may be remunerated at full anaesthetic rate, subject to the provisions of modifier 0035: Anaesthetic administered by a anaesthesiologist/ anaesthetist and modifier 0036: Anaesthetic administered by a general practitioner</p>			2	290.62	2	290.62	
0034	<p>AM: Head and neck procedures: All anaesthesia administered for diagnostic, surgical or X-ray procedures on the head and neck shall carry a minimum of 4.00 basic anaesthetic units. For anaesthesia lasting more than one hour, the units used to calculate the fee for anaesthesia administered by a general practitioner will be 4/5 (80%) of that applicable to a specialist anaesthesiologist, provided that no anaesthesia shall have a total value of less than 7.00 anaesthetic units. Please note that the 4/5 (80%) principle will be applied to all anaesthesia administered by general practitioners with the provision that no anaesthesia totalling more than 11.00 units would be reduced to less than 11.00 units in total. The monetary value of the unit is the same for both anaesthesiologists/anaesthetists.</p> <p>NOTE: Modifying units may be added to the basic anaesthetic unit value according to the following modifiers (0037-0044, 5441-5448).</p>			7	1 017.17	7	1 017.17

Modifier 0005 (multiple therapeutic procedures/operations under the same anaesthetic) is not applicable if the following procedures are performed together: - Bone graft procedures and instrumentation are to be coded in addition to arthrodesis (fusion). - When vertebral procedures are performed by arthrodesis (fusions), bone grafts and instrumentation may be coded for additionally. ii. Modifier 0005 (multiple therapeutic procedures/operations under the same anaesthetic) would be applicable when arthrodesis (fusion) is performed in addition to another procedure, e.g. osteotomy, laminectomy.

RADIOLOGY 5 DIGITS CODE RULES

This schedule must be used in conjunction with the Radiological Society of S A Guidelines. Please refer to the PET guidelines in Annexure D.

This schedule is for the exclusive use of registered specialist radiology practices (Pr No \"038\") and nuclear medicine practices (Pr No \"025\"). \"025\" practices may only charge the codes with a 3rd digit of 9. \"038\" practices may charge all codes except codes with a 3rd digit of 9. Practitioners registered as both radiologists and nuclear physicians may charge all codes. Neurosurgeons accredited by the RSSA may charge for the neuro-interventional studies at 100% of the published radiology rate subject to preauthorisation and this excludes equipment fees or any other claims for the same event.

Code Structure Framework

a. The tariff code consists of 5 digits

i. 1st digit indicates the main anatomical region or procedural category.

- 0 = General (non specific)
- 1 = Head
- 2 = Neck
- 3 = Thorax
- 4 = Abdomen and Pelvis (soft tissue)
- 5 = Spine, Pelvis and Hips
- 6 = Upper limbs
- 7 = Lower limbs
- 8 = Interventional
- 9 = Soft tissue regions (nuclear medicine)
- eg \"Head\" = 1xxxx

ii. 2nd digit indicates the sub region within a main region or category eg.

- \"Head / Skull and Brain\" = 10xxx

iii. 3rd digit indicates modality

- 1 = General (Black and White) x-rays
- 2 = Ultrasound
- 3 = Computed Tomography
- 4 = Magnetic Resonance Imaging
- 5 = Angiography
- 6 = Interventional radiology
- 9 = Nuclear Medicine (Isotopes)

eg:

\"Head / Skull and Brain / General x-ray\" = 101xx

iv. 4th and 5th digits are specific to a procedure / examination, eg

\"Head / Skull and Brain / General / X-ray of the skull\" = 10100.

Guidelines for use of coding structure

•The vast majority of the codes describe complete procedures / examination and their use for the appropriate studies is self-explanatory.

•Some codes may have multiple applications and their use is described in notes associated with each code

•Codes 00510 to 00560 (Angiography machine codes) may only be used by owners of the equipment and who have registered such equipment with the Board of Healthcare Funders / RSSA.

•The machine codes 00510, 00520, 00530, 00540, 00550, 00560 may not be added to 60540, 60550, 70530, 70535 (Antegrade Venography, upper and lower limbs)

•Where public sector hospital equipment is used for a procedure, the units will be reduced by 33.33%.

<p>Consumables</p> <ul style="list-style-type: none"> •Contrast Medium <ul style="list-style-type: none"> oPrior to the implementation of Act 90, contrast will be billed according to the official 2004 RSSA reimbursement price list, without mark up. oAfter the implementation of Act 90, contrast medium will be billed according to the suppliers' list price, without mark up. •Angiography catheters, angioplasty balloons, stents, coils and other embolisation materials, guide wires and drains are to be billed at net acquisition cost, without mark up, until the implementation of Act 90. •All other consumables are to be billed at net acquisition price, until the implementation of Act 90. Thereafter Act 90 regulations apply. •The cost of film is included in the comprehensive procedure codes and is not billed for separately. •Appropriate tariff codes must be provided for consumables.
<p>General Comments on Procedural Codes</p> <ul style="list-style-type: none"> •All x-ray tomography codes are stand alone studies and may be used as a unique study or in combination with the appropriate regional study if done simultaneously. May not be added to 20130, 42110, 42115. •Setting of sterile tray is included in all appropriate procedure codes. •Where introduction of contrast is necessary eg. sialography, arthrography, angiography, etc, the codes used for the procedures are comprehensive and include the introduction of contrast or isotopes. •The use of Doppler or Colour Doppler as an adjunct to a study (eg small parts thyroid) is included in the code for that study. •CT Angiography (10330, 20330, 32300, 32310, 44300, 44310, 44320, 44330, 60310, 70310, 70320) are stand alone studies and may not be added to the regional contrasted studies (see 10335, 20340, 20350, 44325 for combined studies). •Angiography and interventional procedures include selective and super selective catheterization of vessels as are necessary to perform the procedures. <p>Codes 00230 (Ultrasound guidance), 00320 (CT guidance) and 00430 (MR guidance) are stand alone procedures that include the regional study and may not be added to any of the ultrasound, CT or MR regional studies</p>

ANNEXURE D. PET GUIDELINES	
INDICATIONS	
For the purposes of this guideline, only established indications for PET-CT are included and this relates to the more common types of malignancies as seen in practice. While some of the less common forms of cancer may also yield advantages with PET-CT imaging, there is as yet insufficient published data to support the general use and these have been excluded in the list below. This situation may change as new research and information becomes available.	
<p>1. Non-small cell lung carcinoma (NSCC)</p> <p>a) Primary diagnosis of lesions</p> <p>i. >10mm diameter lesions where conventional imaging and biopsy have been inconclusive.</p> <p>b) Staging especially where curative surgery is planned</p> <p>i. Evaluation of primary tumour (T-stage).</p> <p>ii. Suspected nodal disease or characterization of nodal disease</p> <p>iii. Suspected distal metastases of determining extent of metastases.</p> <p>iv. Solitary distal metastasis where metastatectomy is considered. PET-CT is used to exclude additional lesions which would preclude surgery.</p> <p>c) Investigation of suspected recurrence (restaging)</p> <p>i. Local or regional recurrence</p> <p>ii. Nodal or distal recurrence</p> <p>iii. Determine the extent of proven recurrent disease</p> <p>iv. Differentiate fibrotic mass from active disease</p> <p>d) All patients with proven carcinoma of the lung, who are considered for curative resection, should be imaged with PET-CT prior to surgery.</p> <p>e) Current available literature confirms that PET-CT is more accurate than CT or PET alone for staging and restaging of NSCC.</p>

ANNEXURE: C

Item 2800 and 2802 as part of anaesthesia

2800 – Plexus nerve block
2802 – Peripheral nerve block

The motivation for the use of one of these codes in addition to that for the “normal” anaesthesia is that it controls post operative pain and minimises the use of pain injections / medication and encourages early mobilisation.

It is reasonable if the injury / surgery is of sufficient nature to expect much pain post operatively, such as in the fracture of a long bone that was surgically reduced and fixated.

It is however not reasonable in cases of a simple fracture to a hand bone / foot bone or uncomplicated amputation of a finger / toe or other simple procedures.

Examples of claims where the use is reasonable:

- open reduction / internal fixation of a femur / tibia – fibula / humerus / radius – ulna
- total knee replacement / total hip replacement

Examples where the use of the codes is not reasonable:

- one fracture in the hand / foot treated surgically
- amputation finger / toe or part of finger / toe
- arthroscopy of the ankle / knee / shoulder

The use of these codes could also be reasonable were a “crushed foot” injury because of many fractures and multiple procedures in one operation.

Item 2800 and 2802 as part of treatment

There also are instances where the use of the codes is part of the treatment (no surgery performed and is not part of general anaesthesia as such). This is why the codes were put into the tariff structure in the first place.

Multiple rib fractures are treated with a nerve block for pain management and that would be acceptable.
